

BULLS

&

BEARS

THE ULTIMATE
TRADING SIMULATION

THINK YOU CAN READ
THE MARKET BEFORE EVERYONE ELSE?

Bulls & Bears is a fast-paced trading simulation where you'll start with **\$100,000** in virtual cash and compete to build the most valuable portfolio.

HOW IT WORKS

Start with
\$100,000 in virtual cash.

At the start of each round, you'll receive a news flash containing **5-6 fictional market events**.

Trade real-world stocks using virtual money.

Analyze the information and decide which stocks to **buy** or **sell**.

The game consists of **8 trading rounds**.

You can also negotiate **stock-for-stock swaps** with other participants and execute the agreed trade through the official trading platform.

Each trading window lasts **10 minutes**.

The participant/team with the highest final portfolio value **wins**.

At the end of the final round, all participants must sell their remaining shares.

BULLS & BEARS

THE ULTIMATE TRADING SIMULATION

RULES

Each stock has a limited number of shares available.

You cannot buy more shares than are available.

You cannot sell shares you don't own.

Stock swaps must be confirmed by both participants.

Stock + cash combinations are not allowed in swaps.

Trades are only allowed during the **10-minute trading window**.

All news used in the simulation is fictional and created specifically for the game.

All trades must be executed through the official trading platform.
